

THE LASER CUTTING CO

## Autumn 2007 Newsletter

Laser Cutting are pleased to announce:-

- **NEW** annual tubular contracts, worth more than £500k, for high spec, structural tube cut to our customers' specifications - who are leading manufacturers of aerial and access platforms - ***Interested in learning more? - then call the Laser Cutting Sales Team.***
- High lift safety platforms and handling systems are a growth market place for many of our manufacturing clients who need quality cut components that help them to drive constant change and improvement - which benefits the Health & Safety of people in all forms of industry and leisure.

***Could you benefit from more accurately cut component parts? Then call the Laser Cutting Sales Team.***

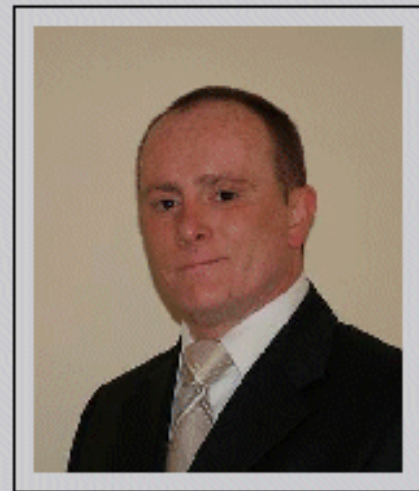

Further investment plans continue with the next phase to install additional flatbed facilities. We are currently analysing industry leading Laser flatbed machines to determine the best fit with the existing machinery within the company to add maximum competitive advantage for our customers.

## NEW EMPLOYEE - WAYNE EXELBY

Wayne joined Laser Cutting in April this year and has become a valuable member of the team, heading up the Tube Division.

Wayne says, "I've really settled into the team and I'm delighted that everyone has a strong customer focus with a high quality work ethic. In fact, it's the highest I've ever seen in the industry! I know that I can grow here and help develop win-win relationships with clients."

Wayne's biggest strength lies in his ability to help and advise clients looking for possible ways of improving efficiency in production and lead times.

## NEW EMPLOYEE - CHARLES WILDE

Charles D. Wilde I.Eng, FIET, also joined Laser Cutting as Company Secretary in August 07. Dennis is an Aerosystems, Electronic and Mechanical Engineer and has extensive knowledge of Military systems. With massive new 6 figure investment the future prospects and growth plans look very bright indeed.

Why not download our new Specification Sheet - <http://www.lasercutting.co.uk/pdf/laserpss.pdf>

It's a simple outline of our ability across flat and tube cutting in an easy to read format.

Thanks for an eventful 2007 so far, as we stride ahead with an investment and improvement plan we are ever mindful that none of this would be possible without you - our very, very valuable customer.

Best regards

**Dee Wilde**
